

use these **3** tips to select a stylist

TIP ONE: Choosing a stylist solely by price doesn't work. The truth is when we invest wisely, we get what we pay for: great services and guarantees.

Remember if you call the cheapest stylist you'll get a so-so job, done with very little service, poor products and no guarantees. The lowest priced stylist is often no bargain at all.

TIP TWO: Make sure you see examples of a stylists work. Ask to see pictures and ask for references or testimonials. Make sure the stylist is straight with you. Often times the difference between leaving the stylist in tears of pain or tears of joy is simple communication.

TIP THREE: Doing it yourself is a waste of time. Sure you can buy a set of clippers attached to a vacuum, or stand over the bathroom sink and go crazy with the scissors. But will you look your best?

If those methods could make you look like a million bucks I would have never spent the time and money on going to college to become a licensed professional. Use these three tips to select a stylist.
